

## Quantum™ pH Down

Quantum™ pH Down decreases the pH level in swimming pool water.

### Features:

- Aids in the prevention of staining, scaling and clouding
- Increases sanitizer efficiency
- Dissolves quickly

### Applications:

#### Directions:

When the pool water pH value is above 7.8, as determined by the use of a reliable test kit or test strips, add 4 oz. (1/4 lb.) of Quantum™ pH Down while the pump is in operation for each 10,000 gallons of pool water by distributing it into the deep end of the pool (but not near metal fittings or the skimmer.) Allow 6 - 8 hours for distribution of the chemical throughout the pool and then recheck the pH.

### Sizes:

4 lbs.  
10 lbs.

### Compatible With:

Chlorine, bromine, ozone, salt water and biguanide
