

The Jack's Magic Program

Identify, Remove, Prevent

Do you have a stain or scaling issue in your swimming pool or spa?

The Jack's Magic Three Step Program is a program we have developed as a quick, easy, and effective way to remove stains & scaling and prevent any issues from returning to your pool. Follow the steps below to save time & money and to keep your swimming pool or spa sparkling clean.

If you have any questions about how to proceed, or if you have a question at any step, please call (800) 348-1656 (you can call through Skype) to speak to a technician.

Step 1: Identify

Step 1 will help you identify which of our products is best used in your pool.

To do this, we recommend using the Stain ID Kit, which is designed to take the guesswork out of removing swimming pool stains. One of the (4) simple topical tests will identify what best removes a swimming pool stain and will show you how effective our stain removal products can be. ** If you have brown stains on your steps in a vinyl liner pool, the **Step Stuff** may be used. **

For information on how to perform the Stain Identification tests, please also see: **Stain ID Kit** (p/n142062)

It is very important that your water chemistry is within the listed parameters while you use the Stain ID Kit.

Step 2: Remove

Step 2 will help you remove the stain or scale from your swimming pool or spa.

Your results from the Stain Identification Kit will determine which of the following treatments you should follow for the best results in your swimming pool. **Do not perform a stain or scale treatment before you have used a Stain ID Kit.**

For information on how to perform the treatment that best worked in your pool, please also see Stain Treatments:

Stain #1 Treatment (p/n 142055 OR 142056)

Stain #2 Treatment (p/n 142057 OR 142058)

O2 & Stain #2 Treatment (p/n 142059)

Iron Scale Treatment (under p/n 142062)

Step 3: Prevent

Step 3 will help you use our sequestrant products to help prevent large-scale staining or scaling from reoccurring in your pool or spa.

	<p style="text-align: center;">The Magenta Stuff</p> <ul style="list-style-type: none">• 50% Stronger - 1 quart treats 15,000 gallons• Great for start-ups - controls plaster dust• Works with all sanitizer systems (including salt - cleans cells)• Removes scale and prevents stains• Will not yield phosphates levels in pool water
<p style="text-align: center;">The Blue Stuff</p> <ul style="list-style-type: none">• A broad range preventative that is highly effective in copper, iron, and scale situations.• Safe for all pool finishes• Extremely chlorine tolerant.• Testable with the JM Sequest Test Kit	

The Pink Stuff

- Designed to work in higher chlorine residuals; the real world.
- Prevents metal/mineral stains and scale
- 2-5 times as strong as any competitive products on the market.
- Testable with the **JM Sequest Test Kit**

The Purple Stuff

- This sequestering product has been designed to be utilized in all pool systems, including salt.
- A broad range preventative that is highly effective in copper, iron, and scale situations.
- Helps keeps silica in solution while greatly reducing the incidence of cell fouling (scale) in chlorine generators.
- Ideal for pools maintained with sodium hypochlorite (liquid bleach), and helps to eliminate the "clouding" effect when liquid bleach is added.
- Testable with the **JM Sequest Test Kit**

The Ionizer Stuff

- For use with copper/silver/zinc pool treatment or sanitation systems
- Helps prevent copper/silver precipitation or staining.
- Extends electrode life

If you are unsure which sequestrant to use or have any questions, please call (800) 348-1656 (You can call through Skype) to speak to one of our technicians.
