

VL Series[™]

SAND FILTER SYSTEMS

- 13" Sand Filter with 30 GPM Pump
- Easy to Install
- Ideal Replacement Filtration System for Soft-Sided, Above-Ground Pools

VL Series™ Sand Filter Systems

13-Inch Sand Filter with 30 GPM Pump

- Extend time between cleaning compared to standard cartridge filters provided with many soft-sided pools
- 1 ¼" and 1 ½" hose adapters included
- Systems are designed for quick assembly and precise alignment of components

Filter

- Holds 42 pounds of #20 silica sand
- Integrated pump base
- Multi-position top-mount valve provides maximum flow at low pressure drop
- Made with corrosion-proof, molded thermoplastic

Pump

- Incredibly quiet operation
- Performance matched to the filter for minimal energy consumption
- Clear cover lets you see when basket needs cleaning
- 115 Volt, 60 hz

Feature	Benefit	Advantage
Sand Filter Technology	Extend time between cleaning (backwashing)	Cartridge elements provided with many soft-sided pool systems must be replaced regularly
Familiar two-piece flange clamp design	Easy to install and provides simple servicing	One-piece clamp designs can be very difficult to align and install
Pump hair and strainer basket included	Prevent large debris from clogging pump impeller	Pumps provided with many soft-sided pools do not include a strainer basket, increasing potential for clogged impeller

VL Series Specifications	
Filter type:	No. 20 silica sand (.45 mm – .55 mm)
Filter tank with integrated pump base:	Molded polymeric
Control valve:	Four-position, top-mount valve with lever-action handle
Valve fastening:	Flange clamp design
Pump and motor:	30 GPM Pump – 115 volts
