

Remote Pool Management System

AquaConnect premium remote pool management service allows you to monitor and control your customers' pools from anywhere, 24/7/365. Use it to differentiate yourself from your competitors while increasing revenue and lowering your costs.

AquaConnect Web

Streamline your pool and spa management service with AquaConnect® Web. The platform allows you to remotely manage all the pools on your routes, from anywhere. It puts you in direct contact with hundreds of your customers' pools and spas simultaneously. You can monitor, control and react to more than 100 conditions, parameters and settings. On the road? No problem - you have the same level of control with a web-enabled device such as a BlackBerry®, iPhone®, iPad® or iPod Touch®. You can make virtually any adjustment just as if you were in your customer's back yard.

- Offer your customers professional, cutting edge pool maintenance service
- Differentiate your business from the competition
- Grow your business without increasing staff or expenses
- Up-sell customers to profitable technology platforms
- Reduce service calls and be better prepared for those you make
- Receive alerts, and service history reports, charts and graphs to help identify trends
- Protect your investment during warranty period
- Reduces inventory and chemical costs
- Premium service = higher rates @ lower costs
- Solve water and equipment issues before they get out of hand
- Perform energy audits and save your customers money

Available on [ProLogic](#), [AquaPlus](#) and [AquaRite Pro](#).

AquaConnect App

The new AquaConnect App for iPhone, iPad®, and Android™ enhances the visual display on your smart device, allowing for easier reading of diagnostics, settings and adjustments while out and about. With streamlined platform navigation and quicker platform access, monitor your customer's pool settings and parameters more easily and efficiently.

Find the iPad® and iPhone® App on the iTunes® Store and the Android™ App on Google® Play.

Available on Hayward ProLogic®, AquaPlus®, and AquaRite® Pro.

AquaConnect Home Network

AquaConnect Home Network is the network device needed to bridge pool and spa controllers with your customers' home networks. You can offer this application to home owners who would like to manage their own pool using their home computer, laptop or a Wi-Fi device within their property.

Available on [ProLogic](#), [AquaPlus](#) and [AquaRite Pro](#).

AquaConnect Home Automation

AquaConnect Home Automation is perfect for your customers with a home automation system. It allows their pool and spa controller to interface seamlessly with their home automation system so that one keypad or display panel can handle anything from home theater equipment, security, lighting, landscape sprinklers and other backyard functions. It's compatible with home automation platforms manufactured by Crestron, AMX, Savant and Vantage.

Available on [ProLogic](#) only.
