

Directions for use:

Spa pH Increaser

Read entire label before using

1. Test spa water for pH level
2. Compare pH test results to chart below to determine appropriate amount of **Spa pH Increaser** necessary to make adjustment
3. With the spa not in use and circulation pump operating, add required amount directly into spa water
4. Continue circulating water a minimum of 30 minutes
5. Retest, adjust if necessary

Dosage Chart

All values are in dry ounces
