Directions for use:

Spa pH Increaser

Read entire label before using

- 1. Test spa water for pH level
- Compare pH test results to chart below to determine appropriate amount of Spa
 pH Increaser necessary to make adjustment
- 3. With the spa not in use and circulation pump operating, add required amount directly into spa water
- 4. Continue circulating water a minimum of 30 minutes
- 5. Retest, adjust if necessary

Dosage Chart

All values are in dry ounces

Spa Volume	pH 7.4 or greater	pH 7.3	pH 7.2	Less than pH 7.2
